Bibielle Grade Comparison Chart

Surface Conditioning Abrasives | Customer Selection Guide

Bibielle Grade	Product Family	Approx. Grit Comparison
HD Coarse	Surface Conditioning	50-60
HD Medium	Surface Conditioning	60-80
A/O Coarse	Surface Conditioning	80
A/O Medium	Surface Conditioning	100-120
A/O Fine	Surface Conditioning	150
A/O Very Fine	Surface Conditioning	180-220
S/C Ultra Fine	Surface Conditioning	280-320

Grade comparison note

The values shown are approximate comparisons only. Non-woven and surface-conditioning grades do not directly correspond to conventional coated-abrasive grit sizes.
Cutting action and final finish may vary with abrasive construction, workpiece material, pressure, speed and application method. Product testing is recommended before production use.

Abbreviations: A/O = Aluminium Oxide | S/C = Silicon Carbide | HD = Heavy Duty
